View Solution play_arrow Other function performed by kidney apart from excretion is View Solution play_arrow Appearance of facial hairs in a woman may be due to the effect of View Solution play_arrow View Solution play_arrow Parathormone deficiency produces muscle ramps or tetany as a result of View Solution play_arrow View Solution play_arrow Browse over 1 million classes created by top students, professors, publishers, and experts. Study Physiology Question Bank using smart web & mobile flashcards created by top students, teachers, and professors. Prep for a quiz or learn for fun! All rights reserved © 2022. Designed by AnaesthesiaUK. {Site map} {Site disclaimer} {Privacy Policy} {Terms and conditions} This set of Human Physiology Question Bank focuses on “Excretory System in Man”. 1. A condition in which body’s internal environment remains nearly constant is called as _____ a) Homeostasis b) Hematoma c) Hemostasis d) Hemopoiesis View AnswerAnswer: a Explanation: Homeostasis can be defined as the stable condition of an organism and of its internal environment or as the maintenance or regulation of the stable condition. 2. The presence of arginase confirms that _____ a) Urea cycle is operating b) Arginine is being converted to ornithine c) Urea cycle maybe operating d) Arginine is being converted to citrulline View AnswerAnswer: b Explanation: Arginine is an alpha amino acid. Arginase is a manganese containing an enzyme, it is the final enzyme of urea cycle. Arginine and water forms ornithine and urea. 3. Removal of amino group to transform into keto acid is called _____ a) Transamination b) Deamination c) Ammonification d) Amination View AnswerAnswer: b Explanation: Deamination is the removal of an amino group from a molecule. In human deamination takes place in liver however glutamate is deaminated in kidneys. Note: Join free Sanfoundry classes at Telegram or Youtube 4. In the ornithine cycle which of the following waste is removed from the blood? a) Urea and urine b) Carbon dioxide and urea c) Ammonia and carbon dioxide d) Ammonia and urea View AnswerAnswer: c Explanation: Urea cycle is also known as Ornithine cycle. It converts highly toxic ammonia to urea for excretion. It takes place in the Liver. 5. The function of flame cell is a) Excretion b) Digestion c) Respiration d) Reproduction View AnswerAnswer: a Explanation: Flame cell is a specialized excretory cell found in freshwater invertebrates. Flame cells function like kidney removing waste materials. Take Human Anatomy and Physiology Tests Now! 6. Urea is directly produced in mammals from _____ a) Breakdown of arginine b) Oxidative deamination of proteins c) Breakdown of ornithine d) Ammonia released by oxidative deamination View AnswerAnswer: d Explanation: Urea is directly produced in mammals from ammonia released by oxidative deamination. During oxidative deamination amino acid is converted into corresponding keto acid by removal of amine functional group as ammonia and amine functional group. 7. Which blood vessel carries the least amount of urea? a) Pulmonary vein b) Renal artery c) Renal vein d) Hepatic portal vein View AnswerAnswer: c Explanation: Renal veins are veins that drain the kidney. They connect the kidney to the inferior vena cava. They carry blood filtered by the kidney. Renal vein carries the least amount of urea. 8. The amino acid that acts as carrier of ammonia from skeletal muscle to the liver is _____ a) Alanine b) Glutamine c) Methionine d) Arginine View AnswerAnswer: b Explanation: Glutamine is an alpha amino acid used for the biosynthesis of protein. It carries ammonia from skeletal muscle to the liver. 9. Primary excretory organs are kidneys while accessory excretory organs urinary bladder. a) True b) False View AnswerAnswer: b Explanation: Primary excretory organs are kidneys while the accessory excretory organs are skin lungs and liver. 10. Which of the following facilitates reabsorption of water by nephron? a) Medulla b) Cortex c) Pelvis d) Loop of nephron View AnswerAnswer: d Explanation: Nephron is a functional and structural unit of kidney. Loop of nephron facilitates reabsorption of water. Sanfoundry Global Education & Learning Series – Human Anatomy and Physiology. To practice Human Physiology Question Bank, here is complete set of 1000+ Multiple Choice Questions and Answers. Next Steps: Get Free Certificate of Merit in Human Anatomy and Physiology Participate in Human Anatomy and Physiology Certification Contest Become a Top Ranker in Human Anatomy and Physiology Take Human Anatomy and Physiology Tests Chapterwise Practice Tests: Chapter 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 Chapterwise Mock Tests: Chapter 1, 2, 3, 4, 5, 6, 7, 8, 9, 10 Manish Bhojasia, a technology veteran with 20+ years @ Cisco & Wipro, is Founder and CTO at Sanfoundry. He lives in Bangalore, and focuses on development of Linux Kernel, SAN Technologies, Advanced C, Data Structures & Algorithms. Stay connected with him at LinkedIn. Subscribe to his free Masterclasses at Youtube & technical discussions at Telegram SanfoundryClasses. Looking for the best bank in America? Don't look at any of the bigs like Bank of America, Chase, Well Fargo, or Citibank. Credit unions are king I have long believed companies that romance their employees succeed in the marketplace because their workers in turn romance the customer. Now a recent report from the American Customer Satisfaction Index (ACSI) bear out my belief. In the past, the ACSI people tracked companies that have done well in their survey data and determined that those stocks increased over time at about 3 times the rate of those companies who didn't score well. This recent ACSI took a look at the financial sector, among other industries. Their findings revealed that the bigger the bank, the worse the customer service. Credit unions earned an 85, the highest score of any industry they researched. Small local community banks earned an 83. Bank of America, by contrast, gets a 69 and that's up from 66 the year before! So they're less bad than they were... Of course, it's important to note that even credit unions can vary in quality. USAA is tops too in another survey Another more recent tally from the Motley Fool names USAA as the best bank in the nation for the 5th year in a row! The military insurer has a very large bank that is branchless. You do all transactions online or via a mobile app. (By the way, USAA is often routinely cited as a top insurer by Consumer Reports and J.D. Power.) My oldest brother has used USAA as his only bank for years and years. He reports that it's so easy to do business with them and they don't have every gotcha fee in the book. For further reading:
